If you wish to begin your Honors Program work by enrolling in an Honors Enduring  
Questions seminar, please attach:

- A Brief Essay (2-page minimum, typed) that considers the question: “What should the goal of human life be?” Your challenge is to respond to the question in a memorable way—offering something a college-educated reader might gain from reading and might recommend to others in turn. To achieve this goal, you should seek to analyze the subject with some intellectual rigor, explore multiple possibilities, and go beyond “top of the head” general knowledge. Be sure to synthesize your content clearly and coherently, skillfully integrating relevant evidence.

If you wish to begin your Honors Program work with an upper-division Honors Project or Thesis, please attach an Honors Project or Thesis proposal form.
